

MSEIA

DISTRIBUTED SOLAR BENEFITS STUDY

Sponsorship Pledge Form

Now that the costs of producing solar power have declined, it is important to quantify the real benefits of distributed solar generation so that the case for more solar generation can be brought to the public. This important study by a respected research team will analyze the various benefits and attach real dollar values to solar generation. We believe the results will support the case for more solar generation given the declining cost of solar electricity. Please support this important study by contributing to its cost. This study will be followed by public outreach to galvanize support for the development of more solar generation.

Yes, we want to help fund the impact study qualifying the benefits of Solar in NJ. We pledge the following amount:

\$300 – Friend of MSEIA. We understand our company name will be listed as friend on the MSEIA website page about this study.

\$500 – Supporters. We understand our company name will be listed as a **supporter** on the study itself and on the MSEIA website page on this study.

\$1,000- Sponsor.
